Scan of the Month

Scan 26

This month's challenge is a continuation of [Scan of the Month 24](#). In that first challenge, you had to decode and analyze a floppy disk recovered from the drug dealer Joe Jacobs. Your mission is to now analyze the floppy recovered from his supplier, Jimmy Jungle. All submissions have to be in by Friday, 21 February. Results will be released Friday, 28 February.

Skill Level: *Intermediate - Advanced*

The Challenge:

In [SotM 24](#) your mission was to analyze a floppy disk recovered from the drug dealer Joe Jacobs. In this new challenge, your mission is to analyze the floppy recovered from his computer savy supplier, Jimmy Jungle. Once again, you will need to read [the police report](#) before continuing. Just as in the last challenge, this situation is fictional, and not based on any real characters or incidents.

Questions

You can find all judging criteria at the [SotM main Page](#).

- Who is the probable supplier of drugs to Jimmy Jungle?
- What is the mailing address of Jimmy Jungle's probable drug supplier?
- What is the exact location in which Jimmy Jungle received the drugs?
- Where is Jimmy Jungle currently hiding?
- What kind of car is Jimmy Jungle driving?
- **Bonus Question:** Explain the process that was performed so that there were no entries in the root directory and File Allocation Table (FAT), yet the contents of each file remained in the data area?"

The Results:

This months judging and team writeups are done by [Daniel Kalil](#) and [Brian Carrier](#).

Writeup from the Security Community

This challenge was one of our most difficult, as it included the use of Stego technology.
